BALBRIGGAN CREDIT UNION SAVES THEIR MONEY WITH IP VIDEO SECURITY

Credit Unions are now discovering the benefits of high resolution IP video surveillance solutions.

Balbriggan Credit Union is one of the largest credit unions in the country and as such has large numbers of customers passing through the branch on a daily basis. The obvious consequence of this high level of footfall is that there is a large amount of cash transactions on any given day. Balbriggan Credit Union had an old analogue CCTV system in place with cameras overlooking the cashiers' desks, lobby area, entrance porch and the external perimeter of the building. Management had consistently found that when incidents occurred on the premises that the playback footage available to them was of very poor quality and of little use in resolving incidents; in particular the counting out of cash to customers.

The fundamental requirements of the credit union when looking at investing in a new video surveillance system was that they would be able to:

- Have clear identifiable images of customers coming through the entrance doors, as they wait in the lobby area and as they wait at the cashier desk.
- Record the entire transaction between the cashier and the customer with particular emphasis on the handover of cash from cashier to customer – and the ability to zoom in on the cash counting in playback to establish the amount of cash being handed over.
- Have clear identifiable images of the outside main entrance in the event of an incident outside the premises as customers leaving the credit union often do so with large amounts of cash
- Integrate their video system with their existing Access Control system - Paxton
- Allow authorised members of staff to access video with full functionality from their own workstation i.e. playback, Digital PTZ, zoom and export

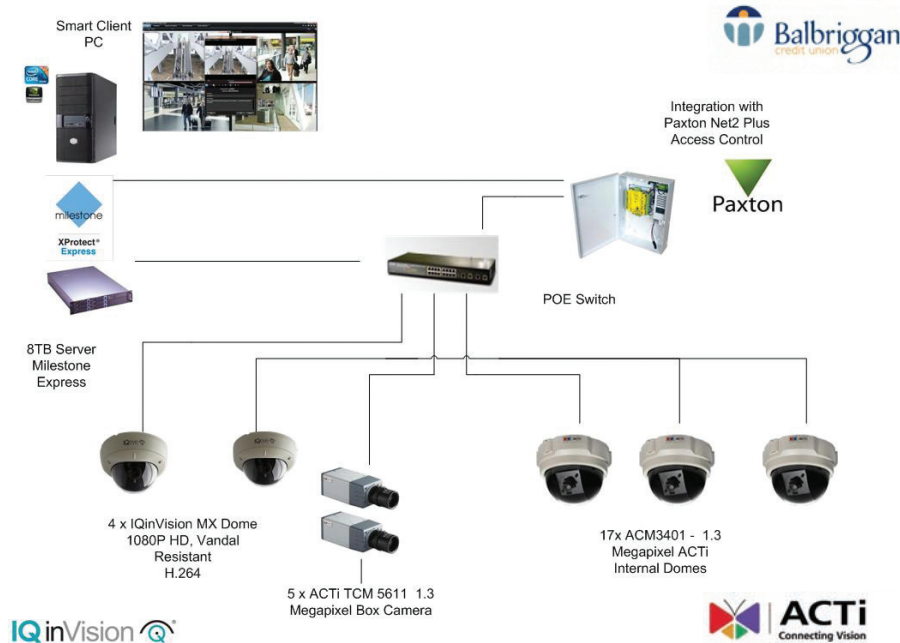

Ultimate Security Technologies, in conjunction with GVD designed a comprehensive solution that would give the credit union all of the above. The cameras are a mix of ACTi and IQEye all recording on the Milestone XProtect® Express platform. The Milestone platform integrates with their existing Paxton access control system. On completion of a site survey it was established that the areas to be covered were:

- Staff working area behind the cashier desks
- Staff corridors
- Entrance porch area
- Lobby area
- Cashier Desks
- External Perimeter

Ultimate Security installed 26 high resolution IP cameras on the site – a mix of internal and external cameras. The Paxton Access Control system is now integrated with their Milestone VMS and each access event is associated with video footage of the time of that event. Management now have high quality video footage from all of the areas they requested, where previously they had poor pixellated images.

For financial institutions the benefits of IP video surveillance solutions are:

- Megapixel picture quality - Ability to get clear footage in playback of cash transactions and to identify the notes and the amount of them being counted out in order to correct errors and resolve disputes
- Integrate with Access Control to ensure direct link between video and access events in high security areas
- Redundant storage to ensure that no video is ever lost in the event of hard drive failure
- A true open platform VMS using Milestone XProtect® Express
- Easy to use and allows multiple users with varying permissions to access the video surveillance system

Ultimate Security is a leading security installer based in the North East of Leinster. We specialise in IP video surveillance, Access Control and Intruder Alarms. As a certified Milestone Professional Partner we offer you the best in class IP Video Surveillance Management platform and recording solution, coupled with the best megapixel cameras available on the market. To arrange a meeting and demonstration contact us today at www.ultimatesecurity.ie

GVD - making IP easy is a specialist value added distributor of IP technology. Visit our NIPX centre & discover the infinite possibilities IP has to offer. www.gvd.ie

GVD FEATURED CASE STUDY PARTNERS

Our GVD partner featured in our case study overleaf is also a Milestone Professional Certified Partner. This means that they have taken part in a one day training course in Milestone XProtect® Professional software. If you want to enjoy the success that our partners are having with Milestone, we would strongly recommend that you become Milestone certified.

MILESTONE XPROTECT® PROFESSIONAL CERTIFICATION AND TRAINING

Objective

The objective of this one-day course is to provide you with a basic understanding of the IP video market and technology, as well as hands-on experience with the single-server solution Milestone XProtect® Professional.

Key Elements - You Get:

- Fundamental education in IP video and its advantages over analogue systems
- Inside look at the convergence of IT and security through IP video surveillance
- Milestone XProtect® Professional product training and necessary technical skills (network, IP video, security)
- Test to be taken on the day, resulting in official certification
- Milestone Official Certification will be sent 2 weeks after completion of course by Milestone HQ in Denmark
- **Free Base Licence + 4 Camera Licence worth €1060**, which can be sold on to an end user or used for your own demo purposes. Licence will be issued on receipt of full payment for the course.

Booking

To book this course, contact GVD Training on 01-4659056 or email info@gvd.ie
