ZEPCAM™
WEARABLE VIDEO TECHNOLOGY
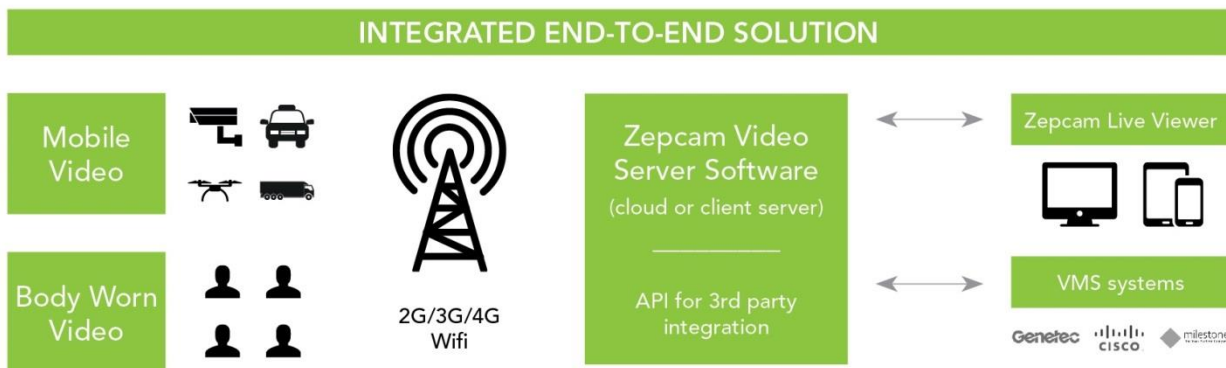

DATA SHEET

ZEPCAM SERVER SOFTWARE

Stand alone software application with Zepcam streaming technology.

The Zepcam T1 Live data like; live video, audio and GPS position can be sent to a computer or emergency room. This data can be sent via public or private networks to the Zepcam Video Server.

The server software has the intelligence to do bandwidth management, storage of streams, two way communication with Zepcam devices, create VPN connections, configure APN connections, administrate users and make integrations with other VMS.

This paper provides information about security, setup and costs of the Zepcam video server software (VSS).

Zepcam network architecture:

SECURITY

- Video Server is protected by Firewall
- Storage of data on the Zepcam Video Server: protected against SQL injection.
- Connection to Video Server web application: HTTPS connection possible
- Underlying software is equipped with latest Linux security patches
- Download videos from server: encrypted (HTTPS is covered)
- Access web application (incl. URL sharing) using name / password combination
- Access API (by video management software) using name / password combination

Zepcam works continuously to improve the security of its system.

SETUP

Contact your Zepcam representive to get a download and activation email of the server software. Once installed you need to validate the software with User ID, registration code and license key. For installation support see; *Server installation V2.0* document

The Zepcam video server is based on Linux, Debian 8 as a self-contained installation. For server requirements see; *Zepcam_Video_Server_requirements_2012* document.

Zepcam has a full API available* for integrations with third party software. Some integrations which are already made based on ONVIF; Genetec, Milestone, Cisco, OnSSI.

*additional costs apply

COSTS

The Zepcam server software is an one time fee of € 2.500,- for unlimited systems. This price includes the software package, installation support and activation.

For every Zepcam live stream system connection a fee of € 15 per month per device will be paid. The minimum connection period is 12 months.

The monthly price includes the following:

- (VPN) Connection from Zepcam device to Zepam server
- Server software updates
- Zepcam recorder firmware updates
- Security patches
- Email & telephone support on server and camera systems
